

COVID-19 Patient Screening Guide

May 1, 2020

Patient Screening Questions

1. Has your child or any immediate family recently travelled to a foreign country or any region in the United States with a high prevalence of COVID-19 in the last 28 days?
 - If yes, you must reschedule when public health authorities and your healthcare provider deem it safe to resume normal activities.
2. Has the patient or any household member had close contact with a person known to have COVID-19?
 - If yes, you must reschedule for a date that is 14 days after the last potential exposure or 28 days after the resolution of any related COVID-19 symptom.
3. Has the patient or any household family member had any of the following symptoms?
 - Fever
 - Repeated shaking with chills
 - Sore throat
 - Muscle pain
 - Lower respiratory illness
 - Chills
 - Headache
 - New loss of taste or smell
 - If yes, you must reschedule when free from symptoms for at least 24 hours without the use of fever reducing medicines.

If the answer to all questions is no, you may proceed.
